

Biological Process

- organophosphate catabolic process
- transition metal ion transport
- multi-organism cellular process
- growth
- cellular biogenic amine biosynthetic process
- protein maturation
- indole-containing compound metabolic process
- reactive oxygen species metabolic process
- pyrimidine nucleobase metabolic process
- carbohydrate phosphorylation
- negative regulation of hydrolase activity
- carbohydrate derivative transport
- glutamate metabolic process
- indole-containing compound biosynthetic process
- protein oligomerization
- regulation of cellular component movement
- organophosphate ester transport
- (obsolete) ATP catabolic process
- response to acid chemical
- hydrogen peroxide metabolic process
- lipid oxidation
- glycosyl compound catabolic process
- positive regulation of translation
- protein autophosphorylation
- dicarboxylic acid transport
